

The Journal of Object Technology

ISSN 1660-1769

<http://www.jot.fm>

Editor-in-Chief

Oscar Nierstrasz (Univ. of Bern)

Editorial Assistant

Claudia Günthart (ETH Zurich)

Founding Editor Emeritus

Richard Wiener (Univ. Colorado)

Publisher

Bertrand Meyer (ETH Zurich)

Steering Committee

Ole Lehrmann Madsen (Aarhus Univ.)

Bertrand Meyer (ETH Zurich)

Oscar Nierstrasz (Univ. of Bern)

Jan Vitek (Purdue University)

Editorial Board

Jonathan Aldrich (Carnegie Mellon)

Kent Beck (Three Rivers Institute)

Jean Bézivin (Univ. of Nantes)

Gilad Bracha (Independent consultant)

Shigeru Chiba (Tokyo Inst. of Tech.)

Theo D'Hondt (Vrije Univ. Brussel)

Sophia Drossopoulou (Imperial Col.)

Stéphane Ducasse (INRIA)

Görel Hedin (Lund Univ.)

Jean-Marc Jézéquel (IRISA)

Joseph Kiniry (IT Univ. Copenhagen)

Doug Lea (State Univ. NY at Oswego)

Gary Leavens (Univ. Central Florida)

Mira Mezini (TU Darmstadt)

Hanspeter Mössenböck (J. Kepler U.)

David Naumann (Stevens Inst. Tech.)

James Noble (Victoria U. Wellington)

Moira Norrie (ETH Zurich)

Martin Odersky (EPFL)

Wolfram Schulte (Microsoft)

Frank Tip (IBM Research)

Laurie Tratt (Middlesex University)

Antonio Vallecillo (Univ. of Málaga)

Vasco Vasconcelos (Univ. of Lisbon)

Eelco Visser (Delft Univ. Technology)

Jan Vitek (Purdue University)

Philip Wadler (Univ. of Edinburgh)

Elena Zucca (Univ. of Genoa)

Mission

The Journal of Object Technology (JOT) is a peer-reviewed, open-access journal dedicated to the timely publication of previously unpublished research articles, surveys, tutorials and technical notes on all aspects of object technology.

Key features of JOT

- JOT is the only journal dedicated to all topics related to object technology.
- Transparent review process.
- Open page limit for detailed, mature work.
- Rapid turnaround and publication schedule.
- Digital object identifiers for articles.
- Free, online publication (no fees).
- New papers announced by email, RSS and Twitter ([@jotfm](https://twitter.com/jotfm)).

Submissions

Submissions are welcome in all areas of Object Technology. JOT welcomes original research contributions, empirical studies and state-of-the-art surveys. For instructions on how to submit your paper, visit the journal web site: <http://www.jot.fm>

Submissions will be evaluated on the basis of their relevance, originality, timeliness, significance and presentation. At least three experts will review all submissions and provide feedback and suggestions. Authors should normally receive notification of a decision within three months of submission. Accepted papers will be published without delay upon receipt of the final camera-ready copy. In addition, all papers published by JOT will be assigned a Digital Object Identifier (DOI) to guarantee their archival nature.

Blog Entries

JOT also welcomes short articles, technical notes, tutorials, technology updates, book and product reviews, guest editorials, columns, and other timely and newsworthy announcements.

Whereas refereed articles should have a strong scientific component, blog postings will be selected for newsworthiness, technical relevance and accuracy. Submissions will be accepted at the editor's discretion, possibly entailing a streamlined review process, and will be published on the JOT Blog as they become available.

Indexing

JOT is currently listed/indexed by Scientific Commons, SCIRUS, Google Scholar, DBLP, DOAJ, Index of IS Journals and SCOPUS.

Contact
